PROFILE

Full-Stack Developer with experience building responsive web applications using modern frontend and backend technologies. Strong experience in **React.js, JavaScript, SQL, REST APIs, and web application development**, with working knowledge of **Python, Django, Django REST Framework, and FastAPI**. Experienced in building scalable UI components, integrating APIs, managing databases, and delivering performance-focused applications.

EDUCATION

M.Sc. Computer Science <i>Guru Nanak Khalsa College (Autonomous), Mumbai</i>	07/2022 – 05/2024 Mumbai, India
Bachelor of Science (B.Sc.) – Computer Science <i>M. D. College of arts, science and commerce</i>	07/2018 – 05/2021 Mumbai, India

PROFESSIONAL EXPERIENCE

Software Developer <i>Softaculous Ltd.</i> - Developed custom frontend components and widgets to enhance interactivity and overall user experience. - Integrated reusable widgets into the Pagelayer Webpage builder, delivering a smooth drag-and-drop UI comparable to Elementor. - Built a dynamic theme selector enabling instant layout and design switching without page reloads. - Collaborated with product and design teams to implement UI/UX best practices across multiple plugins. - Optimized frontend code for performance, stability, and cross-browser compatibility. - Debugged complex UI issues and improved rendering efficiency for production environments. Tech Stack: JavaScript, React.js, HTML, CSS, WordPress, jQuery	01/2024 – 11/2025 Lower Parel, Mumbai

PROJECTS

Vritivrund – React Web Application 📄 <i>Technologies: React.js, Redux Toolkit, HTML, CSS, JavaScript, Netlify</i> - Built a modern, responsive web application using React.js with modular and reusable UI components. - Implemented Redux Toolkit for predictable and scalable state management. - Integrated frontend with backend REST APIs for real-time data interaction. - Focused on UI performance, responsiveness, and clean user experience. - Deployed the application on Netlify for demo and continuous testing. - Actively developing features and preparing the project for live domain deployment.
Crop Leaf Disease Detection System <i>Python PyTorch Flask</i> - Developed a CNN model to classify 39 crop leaf diseases using the PlantVillage dataset. - Built a Flask web app for real-time image-based disease prediction. - Applied deep learning to solve real-world agricultural problems.

SKILLS

Frontend Technologies:

HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, jQuery

UI & Performance:

Responsive Design, Cross-Browser Compatibility, UI/UX Optimization, Component-Based Architecture

Database

MySQL, PostgreSQL, SQL

Backend Technologies

Python, Django, Django REST Framework (DRF), FastAPI, Node.js, PHP, REST APIs

CMS & Tools:

WordPress, Pagelayer Page Builder, Git, GitHub, SVN, NPM, VS Code, Postman

ADDITIONAL INFORMATION

- Available for Python Full-Stack / React + Django roles
- Strong learner with ability to adapt quickly to new frameworks
- Open to on-site / hybrid / remote opportunities
